

## DATASHEET ERGOSEAT NG-S

The Ergoseat NG-S enables the operator to easily work in an ergonomic position. Even when looking downward is required to perform. The Ergoseat NG-S is based on the Ergoseat NG-H. These control stations differ in the way they are mounted to the cabin. The NG-H is mounted to the ceiling while the NG-S is mounted to the floor. Hence, the NG-S can be applied in existing cabins.

There are numerous options to adjust the seat and consoles. This enables operators to easily use the consoles for lower arm support, to allow for less to no neck and back complaints.

### SEAT
