

## DATASHEET RTG CABIN

RTG cranes are destined to move and stack containers quickly and efficiently. Those who operate the crane can rely on a pleasant working environment with our RTG cabin. The cabin is designed to guarantee the operator with good lines of sight (high numbers of windows and square metres of glass), a safe configuration and helpful tools enabling him to work efficiently and healthily.

Our next generation RTG cabins are stronger, with a reinforced cabin construction and optimized force distribution. Safer, with optimal sight lines and full downwards view. Sustainable, with light ABS covers and thus less maintenance.

Ergonomic, with climate control and our special Ergo-seat, for full body support and a healthy sitting position.

### CONSTRUCTION

Basic configuration approx. 260 (l) x 180 (w) x 250 (h) cm  
Reinforced cabin construction & optimization force distribution  
Optimal sight lines & improved floor window angle
